

Ware 4 Bins & Recycling

Bins, Trolleys, Recycling and Waste Containers

Pre-loved bins

In recent years there has been more emphasis on the importance of recycling to help reduce pressure on the Earth's finite resources.

Ware 4 provide advice & equipment to help businesses increase their recycling rates and in doing so reduce their environmental impacts. We believe in practicing what we preach and as a business we try to minimise our own environmental impacts where possible. **Many of our product range are UK manufactured and a large proportion of the plastic bins contain post-consumer recycled plastic.**

In the past few months we have also begun to supply a unique range of **'pre-loved' bins**. These are containers which are no longer required by a company but rather than wastefully discarding them in landfill or sending them away to be recycled we have collected them, cleaned them and supplied them at a greatly discounted 'pre-loved' rate. **The bins we have collected are high quality and durable second hand, ex-sample and discontinued stock, making them ideal for re-use in any business.**

The scheme has proved popular with our first 150 returned 87L Slim Jims being sold within a few weeks. We supplied 77 units to The Whittington hospital where they are being used throughout a number of departments from staff restaurants to wards for the collection of mixed recyclable waste. Alan Perry, Environmental Manager of The Whittington Hospital said *'... We have purchased these bins as part of our programme to increase our recycling rate. Our plan is to be recycling 45% of our waste by 2015...'*

Jane Skinner, Assistant Campus Manager at the **University of East London** made a **special request for over 300 'pre-loved' bins** and we sourced a mixture of returned Envoy bins and redundant stock Slim Jims in order to meet the requirements. These are now being used throughout student halls of residence to trial a brand new recycling scheme for the collection of mixed recyclables.

The 'pre-loved' bins are ideal for schemes with a tight budget or where environmental impacts are recognised as being the most important factor in deciding what to purchase. With the success of the scheme so far Ware 4 will certainly continue to supply a 'pre-loved' range and this is an area we hope to focus more effort on in the future. Our stock offers list is regularly changing so keep up to date with what's on offer by visiting www.ware4.co.uk 'news / updates' or emailing info@ware4.co.uk.
