

Ware 4 Bins & Recycling

Bins, Trolleys, Recycling and Waste Containers

Case Study – Tyneview Primary School

Ware 4 were recently approached by Tyneview Primary School's Year Two Teacher, Vicky Lee, to help her pupils learn more about recycling.

The Challenge

The Year Two class were learning about litter and recycling, and were given a small budget to spend on something to help the environment.

The class wanted to recycle plastic, paper and cardboard and decided that they needed some recycling bins that were bright, colourful and clearly labeled, and which matched their budget.

Here at Ware 4 we offer a wide range of recycling bins suited to a variety of different environments, and we also produce bespoke labeling for specific requirements.

The Solution

Year 2 purchased one of our Budget Recycling Banks, including 3 x 54 litre Flip Top Bins with different coloured lids, 2 x educational wall posters and 3 x brightly coloured recycling labels. We also sent a copy of our electronic guide 'Are You Rubbish With Waste?' to help the class understand more about waste and why recycling is so important.

The Budget Recycling Bank is designed to provide an eye-catching and budget-conscious waste management solution in all environments. The 54 litre bins are easy and quick to service, and are also UK-manufactured.

Year Two's recycling station has now been implemented successfully in their classroom, and the pupils now recycle all their paper, cardboard and plastic.

"Thank you Ware 4 and Sarah for all of your help with the purchase of our recycle bins! You really helped to bring the children's learning on recycling and helping the environment to life. They recycle in class all of the time now and they are very proud of doing so!"

Mrs Lee, Year 2 class teacher

"We love our recycle bins because we can recycle more now. They are really bright colours too. Now we don't put our paper in the bin, we recycle it instead. The same with plastic and cardboard"
